These instructions are valid only for end user countries whose identification symbols (these countries’ abbreviation code) appear on the carton label. The instructions must be translated into official language of end user countries.

---

**Strictly Execute**

- The gas cooktop can be used only in domestic kitchen. Please do not install it in the bathroom, bedroom, basement or places that are flammable, explosive and corrosive.
- Such works as gas cooktop installation, refitting, removal, dismantle, repair should be done installed by authorized installers certified companies and operated by professional people.
- Some gas suppliers provide “Gas Usage Safety Manual.” You must ask gas operating agency for “Gas Usage Safety Manual”, and comply with it. The appliance must be installed in accordance with AS5601, local gas authority regulations, the gas cooktop will go wrong due to gas pressure abnormality.
- To prevent asphyxiation, after installation and before usage, please check you cannot smell gas. Keep the room ventilated when daily use.
- If there is gas leak, please turn off the switch knob and appliance isolating gas valve soon, open the window, contact FOTILE service center to repair it. At this time, don’t touch the power switch or ignite, and don’t use mobile phone, fixed-line telephone etc, to prevent explosion.
Please don’t let the gas cooktop work at strong wind disturbing environment, because it will influence the normal burning, even failed to work.

If there happens burning due to over high oil temperature, please cover the source of fire with large size metal items, like irony pot cover (please don’t use water), and close the general gas valve.

Please periodically replace grease resistant gas rubber hose. Suggest the hose should not be used for more than one and half year. Don’t place the hose on the cooktop or near the cooktop panel.

Please don’t go out or go to bed when gas cooktop is working. Please turn off the knobs and general gas valve after usage and repeatedly check whether they are turned off before you sleep or go out.

Please keep the product plastic package away from the infants, to avoid suffocation, etc.

Forbidden

Do not modify this appliance.

Please confirm the gas type is the same with nameplate indicate before using. It is forbidden to change into other gas type, especially the man-made gas which produces CO.

This gas cooktop is for heating cook utensil, don’t use it for drying towels, clothes, etc. DO NOT USE THIS APPLIANCE AS A SPACE HEATER.

Do not turn on the gas cooktop for heating when there is no pan or there is no food in the pan. It may damage the range hood which is above the stove, even will burn the grease inside of the range hood and cause fire accident.

Please don’t touch the cooktop that is off work for a short while, to avoid scalding.

Do not use or store flammable materials in the appliance storage drawer or near this appliance.

Please don’t place any acidic or alkaline substance on the cooktop (vinegar, lemon juice, etc).

Do not place anything, e.g. flame tamper, asbestos mat, between pan and pan support as serious damage to the appliance may result.

Do not remove the pan support and enclose the burner with a wok stand as this will concentrate and deflect heat onto the hotplate.

Do not use large pots or heavy weights which can bend the pan support or deflect flame onto the hotplate.

Locate pan centrally over the burner so that it is stable and does not overhang the appliance.

Use only a wok support supplied or recommended by the manufacturer of the appliance.

Do not spray aerosols in the vicinity of this appliance while it is in operation.

The glass used in FOTILE products is tempered glass, and the tempering mechanism of glass decides that there is extremely small probability for tempered glass self explosion. Once it happens self explosion do not due to improper use, we promise to replace the tempered glass for free.
**USAGE PRECAUTIONS**

This manual is an integral part of the appliance. Take good care of it and keep it on hand throughout the hob's lifecycle.

We urge you to read this manual and all the information it contains carefully before using the appliance.

The manufacturer declines all liability for uses other than those stated above.

This appliance is not connected to a combustion products exhaust system device. It shall be installed and connected in accordance with current installation regulations. Particular attention shall be paid to the relevant requirements regarding ventilation.

Before installation, please ensure that the local distribution conditions (Type of the gas and gas pressure) and the adjustment of the appliance are compatible.

The appliance are designed for using gases of Natural Gas and Universal LPG.

Never use this appliance for heating rooms.

Never use packaging residues unattended in the house. Separate the various waste packaging materials by type and consign them to the nearest separate disposal centre.

This appliance is marked according to the European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). This guideline is the frame of European-wide validity of return and recycling on waste electrical and electronic equipment.

Never obstruct the openings and slits provided for ventilation and heat dispersal.

The nameplate with the technical data, serial number and mark are in a visible position underneath the casing. The nameplate must never be removed where the data plate cannot be easily seen at installation. The duplicate data plate must be fitted in a adjacent position where it can be seen by the operator.

Poisoning Hazard.

Never use this appliance as a space heater to heat or warm the room.

Doing so may result in carbon monoxide poisoning and overheating of the appliance.

Failure to follow this advice may result in poisoning or death.

Hot Surface Hazard

This appliance becomes hot during use.

Do not touch the cooktop components, burners, pan supports or the ceramic glass when hot.

Fire Hazard

Never leave the appliance unattended when in use. Boilover causes smoking and greasy spillovers that may ignite.

Failure to follow this advice may result in serious injury.

**Explosion Hazard**

Do not use cooktop where flammable materials such as gasoline near this appliance.

Do not spray aerosols in the vicinity of this appliance while it is in operation.

Failure to follow this advice may result in death or serious injury.

**Electrical Shock Hazard**

If the glass should break or crack, turn off the gas supply and switch the appliance off immediately at the mains power supply (wall switch) and contact a qualified technician.

Failure to follow this advice may result in death or electrical shock.

The appliance is intended for use by adults. Keep children at a safe distance and never allow them to play with it.

Always check that the control knobs are turned off after each use.

The manufacturer declines all responsibility for injury or damage caused by failure to comply with the above regulations or deriving from tampering with even just one part of the appliance and the use of non-original spare parts.

**INSTALLATION PRECAUTIONS**

Electrical shock hazard

Failure to do so could result in electrical shock or death.

Cut hazard

Take care-panel edges are sharp.

Failure to use caution could result in injury or cuts.

**Important safety precautions**

- Particular attention shall be given to the relevant requirements regarding ventilation.
- Please make this information available to the person installing the appliance as it could reduce your installation costs.
- This appliance is to be installed and connected and gas supply only by an authorised person.
- Installation must comply with your local building and local gas authority codes and electricity regulations.
- Failure to install the appliance correctly could invalidate any warranty or liability claims.
- This gas appliance is suitable for connection to natural gas or LP gas only. If in doubt, refer to the local gas network operator or gas supplier to confirm gas type at installation site.
Before you install the appliance, please make sure that

- The local distribution conditions (nature of gas and pressure) and the adjustment of the appliance are compatible. For adjustment conditions for this appliance check data plate for relevant gas information.
- This appliance uses 220-240V 50Hz power supply.
- The supply connection point (gas shut-valve) is accessible after installation. The regulator supplied with Natural gas appliances must be fitted to the appliance inlet.
- The benchtop is made of a heat resistant material. the installation complies with all the requirements of Australian and New Zealand Gas Installation Standards (AS5601), including that the product has to be installed so that the surface temperature of any nearby combustible surface will not exceed 65°C above ambient. See page 9 ‘Attachment to support structure, traditional built-in model’.

When you install the appliance

- We do not recommend the use of a down-draught extractor fan with the appliance, as it may distort the flame pattern, causing uneven heating and reduced cooking performance.
- Where this appliance is installed in marine craft or in caravans, it shall not be used as a space heater. Only models fitted with the flame failure device can be fitted in marine craft. No combustible material or products should be placed on this appliance at any time.
- Do not spray aerosols in the vicinity of this appliance while it is in operation.
- If, after following the instructions given, the appliance cannot be adjusted to perform correctly, please refer to the Service & Warranty book for warranty details and your nearest Authorised Service Centre,
- Customer Care, or contact our local distributors.

PACKAGE DISPOSAL INSTRUCTIONS - ENVIRONMENT POLICY

Our products are only packaged using non-pollutant, environment-friendly, recyclable materials. We urge you to cooperate by disposing of the packaging properly. Contact your local dealer or the competent local organizations for the addresses of collection, recycling and disposal facilities. Never leave all or part of the packaging lying around. Packaging parts, and especially plastic bags, may represent a suffocation hazard for children.
Your old appliance must also be disposed of properly. Important: deliver the appliance to your local organization authorized to collect scrapped appliances. Proper disposal allows the intelligent recovery of valuable materials.

- Never leave packaging residues unattended in the house. Separate waste packaging materials by type and consign them to the nearest separate disposal centre.
- The inside of the appliance should be cleaned to remove all manufacturing residues. For further information, see point "CLEANING AND MAINTENANCE".

INSTRUCTIONS FOR THE INSTALLER

The following operation requires building and/or carpentry work, so it must be carried out by a qualified person.
Installation can be carried out with various materials such as masonry, metal, solid wood or plastic laminated wood, as long as they are heat-resistant (T90°C)

PACKING LIST

Please pay attention to the amount of accessories, and make sure there is no scarcity or shatters
(1) Please contact with the dealer when our company or the dealer is responsible for the above carelessness.
(2) Please contact the nearest service center engaged by special arrangement if the user should undertake the responsibility.

Attachment to support structure, traditional built-in model
Create an opening with the dimensions 816mm(L)×460mm(W) shown in the figure 1. On the work surface, observing a minimum distance of 50mm from the rear edge. This appliance can be installed next to walls that are higher than the work surface, as long as the distance "X" is kept between the appliance and the wall, as shown in the figure 2, to avoid damage from overheating. Make sure there is a minimum of 750mm between the work surface and the range hood that may be installed directly above them (figure 2).

Electrical connection
Make sure that using alternating current (AC) as power supply connect the product with the power supply and operate rightly.

- Connection of AC.
  Make sure that the voltage and capacity of the power supply cable conform to the data shown on the plate located under the protective cover.
  The power supply cable plug and the wall socket must be of the same type and conform to the current electrical system regulations. Make sure that the power line is adequately earthed.
  On the power line, install an all-pole disconnect switch with minimum contact gap of 3mm located at an easily accessible position near the appliance.
  Do not use reducers, adapters or shunts.

Gas connection
Important: NG (figure 4)
Ensure the Elbow and NG regulator are connected by PTFE.
Important: LPG (figure 5)
1. Insure the seal ring is fitted.
2. Test point adaptor must be fitted.
   The pressure must be checked and adjusted by the installer.

This appliance is suitable for use with a flexible hose assembly
Hose assembly must comply with AS/NZS 1869, 10mm ID, Class B or D, maximum length 1.0m, and installed in accordance with AS/NZS 5601.1. It should be suitable for connection to a fixed consumer piping outlet located at the region shown in figure 6 and should be suitable for connection to the inlet connection behind the appliance shown in figure 7. The supply connection point can be accessible with the appliance installed.

Warning: Ensure hose assembly is restrained from accidental contact with the flue outlet of an under bench oven.

INSTRUCTIONS FOR THE USER

About your new cooktop
The control knobs can be removed for cleaning by just pulling.

Safety feature: flame failure device
Your cooktop is equipped with flame failure device: the gas supply will automatically be cut off to a burner that is accidentally blown out by a draught or extinguished by a spill.

Specifications and structure

- Be careful the pot (pan) is too heat to cause fire when cooking with vegetable oil and animal fat oil. When cooking with such kind of oil, please don’t leave it alone after you put the food into the pot (pan).
- The stove will heat when using, please keep it off heating items. Such metal objects as knife, fork, spoon and cover, should not be placed on the stove to prevent heat conduction.
Using the gas hob

First of all, check whether knobs is in the ◯ position (refer to (1)). Then turn on the gas switch, press the stove knobs, contra rotate 90 degrees (refer to (3)), to confirm the flame is lighting up. If the flame extinguishes after your hand off the knobs, then please return the knobs to ◯ position, and repeat the above operation.
After the flame burning, please comply with (2) (3) (4) (5) (6) method to turn knob. You can adjust big or small fire according to the demands. And for the small burner you can get the smallest fire when the knob rotate to the position show in (6).
If you need to stop stove working, please clock wisely turn to ◯ position, then the fire will extinguished (refer to (1)). Then close the general gas valve.

Selection of pans

Please choose the proper pan, and you will enjoy better cooking experience.
1. Please make sure the diameter of the pan used is equal to or more than cook area.
2. To avoid rubbing the surface, using clean and bottom-slick pan.
3. To get best cooking results, the bottom of porcelain enamel steel pan shall be 2-3mm thick, the bottom of stainless steel filled pan shall be 4-8mm thick.

Cleaning and maintenance

Notice

Before cleaning and maintaining the stove, switch off the general gas valve and wait for it cooling down thoroughly.
When you maintain the following, make sure not disassemble the safety device or gas duct parts.
Please contact FOTILE service center if there is abnormality.

Check

If the hose is damaged or the emergence of small hole. Please stop using at once and replace it in time.
Never let the spilith block the burner. Make sure there is no food residua, foreign matter and water touch the ignition and thermocouple head.
Please don’t stack the inflammable around the gas stove.
The flame should not be irregular.
Burners, flame caps and pan supports shall be correctly positioned.
Check the interfaces with suds frequently to avoid gas leak.

Please don’t wipe the stainless steel panel with sharp material like steel wire ball, etc. It will greatly shorten the cooktop lifespan.
Every three months, carry out maintenance on the stove:
1. Clean burner, ignition needle, thermocouple;
2. Check the connection stove hose is damaged, loose connections;
3. For deep cleansing of the stove panel, remove surface oil.

Warning: Service to be carried out only by an authorised person.

## Maintenance

1. Before cleaning, please take remove pan supports and flame caps.

2. Moveable parts of burner like copper flame cap must be washed with warm water and neutral cleanser frequently. Remove the nugget and dry it, then use the stove.

3. Please use neutral cleanser which is without corrosiveness, to clean the stainless steel panel and burner. Never use chlorine-base cleanser to clean glass.

4. Make sure that there is no carbon in the firehole, and no jam.

5. Please don’t use such aculeated articles as graininess ablent (putty-powder), clean ball, knife, etc. to clean the residual stubborn besmirch in the burners. Otherwise, it will make the kitchen countertop go wrong or fray the assembly surface, then influence cooktop lifespan.

6. After cleaning, dry them well and install them correctly.

NG gas inlet connection

LPG gas inlet connection
CONVERTING THE COOKTOP FROM NG TO ULPG

All work involved in installation, setting and adaptation to a different gas type must be carried out by authorised personnel from our Service Centre and must comply with current regulations and the conditions laid down by the local gas company. Contact the Distributor to get the parts needed for the conversion. All parts used for the conversion must be the manufacturer’s original parts.

Before conversion the cooktop must be disconnected from the electricity and gas valves must be turned to the OFF position.

**Important**: After finishing, stick the sticker, indicating the new gas type, close to the specifications plate.

### Replacing the injectors
1. Remove all pan supports, burner caps and distributors.
2. Use a wrench to unscrew the injectors then Replace them. It is important to make sure that the injector does not become detached during removal or fastening. They must be properly tightened to ensure that there are no leaks.

### Adjusting the gas valves
1. Dismantle the removable components of the burners. Remove the panel, all the knobs.
2. Use a screwdriver to adjust the bypass screws. Make sure that the flame does not go out and that there are no flashbacks when you turn the put the burners, the panel and all the knobs back into place correctly.

### Replacing burner caps
For the bigger burner, the inner ring cap need to be changed from NG to ULPG (For ULPG, it consists of two parts(p1,p2), which is a whole for NG.)
1. When reinstalling the burner, please match the slot S on P4 to the component W on P5 to complete the placement.
2. Put the P3 - P2 - P1 in turn, and please rotate the P3 360° to ensure it is in the right place.

**Note**: The picture on the right is the demonstration of correct installation.
